## MANAGEMENT of THERAPY in Residential Facilities

- |  |        |
|--|--------|
| 1. uploading of assisted's therapy           | pag.1  |
| 2. pairing of the Node with the right person | pag. 2 |
| 3. administration of the therapy             | pag. 4 |

## 1. Uploading of Assisted's Therapy

After the uploading of the patient's anagraphic, it will be possible to upload the therapy.

In the "Treatments" section, clicking on "New" is possible to upload the medicine and its description. In addition to the **picture**, the **date** of beginning and end and the **frequency**, the **prescriber** needs to be added.

A NFC Tag will be given to every person in order to guarantee the administration of the **Right therapy** to the **Right person** at the **Right time**.

The screenshot shows a web application interface for 'Centro Stella'. The left sidebar contains a navigation menu with items: Dashboard, Users, Audit Logs, Settings, Health Facilities, Locations, Nodes, Operators, Patients, Doctors, Presence requests, Field events, and Treatments (highlighted). The main content area is titled 'New Treatment' and contains the following form fields:

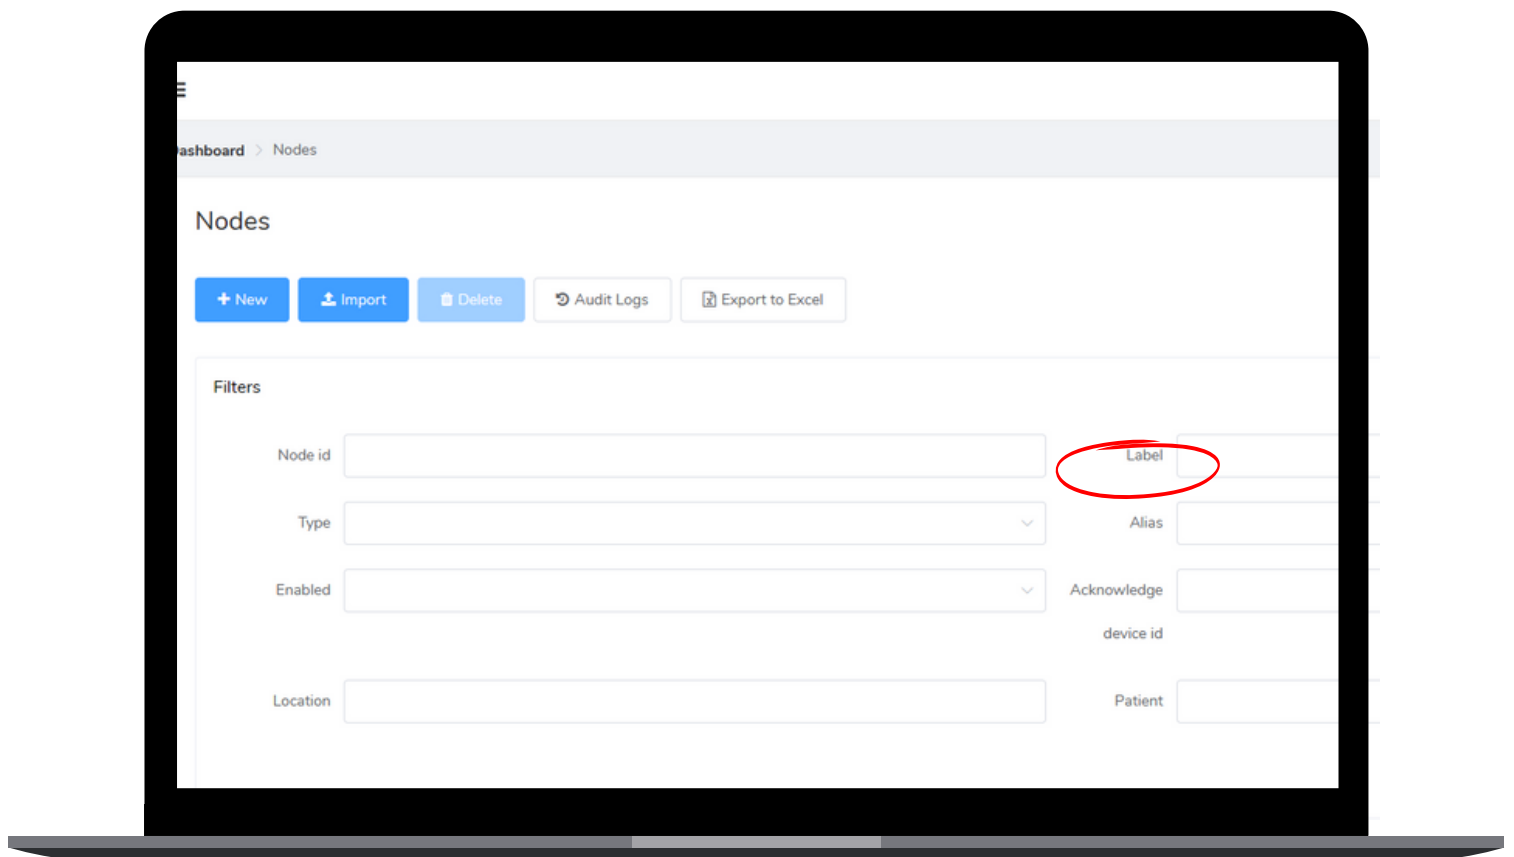

- \* Summary: A text input field.
- Images: A dashed box with a '+' sign for uploading images.
- \* Start Date / Time: A date and time picker showing '2023-11-23 08:00'.
- \* Patient: A text input field.
- Dispenser: A text input field.
- Doctor: A text input field with a blue '+' button to the right.
- \* Frequency: A dropdown menu with 'Select' as the current option.

At the bottom of the form are three buttons: 'Save' (blue), 'Reset' (grey), and 'Cancel' (grey).

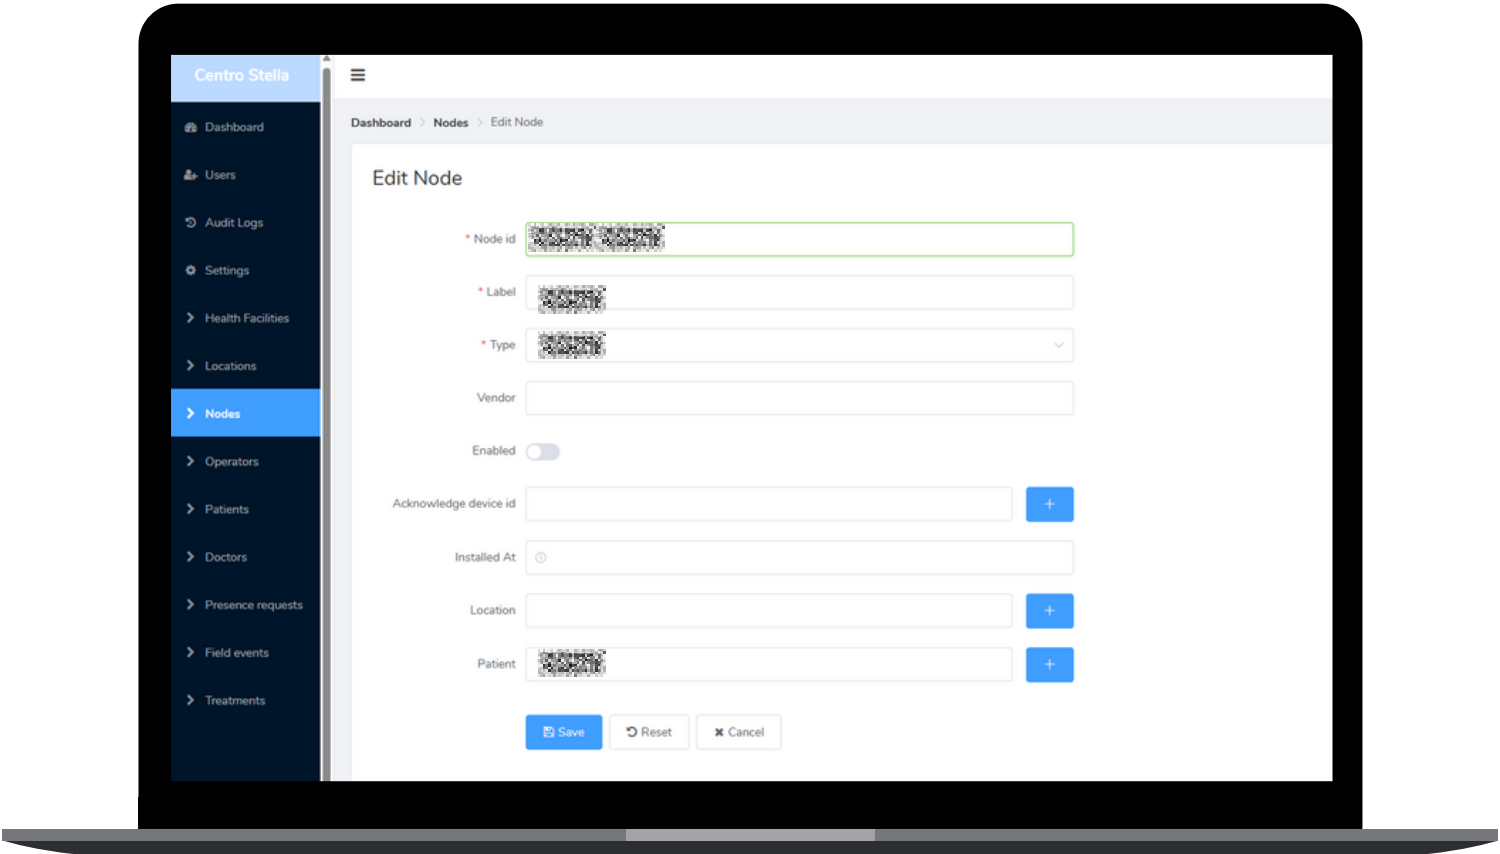

## 2. pairing of the Node with the Right Person

In the “nodes” section, selecting the filters, it will be possible to pair the NFC tag with the Right Person. Writing the NFC tag number in the “Label” field, it will be possible to start the research.

After finding the right NFC Tag, it will be necessary to click on “edit” and the following screen will appear.  
Clicking on “patient”, it will be possible to select the patient previously uploaded and pair the NFC Tag.

### 3. Administration of the Therapy

Getting the smartphone with the App closer to the patient's NFC Tag, the First Name and Last Name of the guest with the picture, a notes field, the "confirm administration" button to push once the administration of the therapy is completed will appear.

In case the therapy is not administered, under the confirmation button there are 6 voices ( patient's refuse, fast, patient's absence, vomit, other, medicine's lack) that can be chosen to motivate the non-administration of the therapy. Once one of the voices is picked, a confirmation button will appear. Clicking "yes", the page will automatically close; clicking "no", the page will return to the administration confirmation screen.
